Increase the percentage of calls to the contact centre answered within 60 seconds - Ebn	80%	47.33%	86.05%	76.48%	80%			<p>The Customer Advisors continue to work hard on trying to maintain the improved stats from Q2 where we hit and exceeded the SLA of 80% of all calls answered within 60seconds for October but then dipped below for November and December where Quarter 3 as a whole was 76.48%.</p> <p>For the first 3 weeks of October (1st to 25th) we managed to hit and exceed our SLA by achieving 87.2% of calls answered within 60seconds. We were then unable to achieve these stats for the remaining week of October after the election was called, the whole of November and then the first 12 days of December until the election took place – this was in despite of additional measures being put in place to bring up the call performance; for example reduced staff in the contact centres and post room as well as enforced half an hour lunches to all Customer Advisors. From the 12th to the 31st December we were then able to achieve and exceed our performance SLA by reaching 87.9%.</p> <p>Although we were just shy of hitting out SLA for Q3 this was largely down to the snap General Election which put a lot of additional pressure on the call and contact centres where we already had a 9FTE vacancy or in training on top of long term sick.</p> <p>We are hopeful that as we enter the new calendar year and Quarter 4, our stats will improve greatly without the pressure of the Election and our remaining new staff finishing their training.</p> <p><b>Performance Improvement Plan:</b> To ensure our continued projected increase in performance, our last recruitment round saw our then current vacancies filled with start dates agreed from the 6th January. In addition to another recruitment round new 2FTE vacancy, we will be exploring the additional help of Agency Staff to help handle the influx of calls from January to March as we approach Garden Waste</p>

Average days lost per FTE employee due to sickness (J)	<b>8.0 days</b>	2.2 days	2.1 days	2.72 days	<b>2.0 days</b>			<p>Q3 sickness absence increased from Q2, although we would expect an increase during the winter months. It is less than Q3 2018-19 which was 2.79 days. Removing LDC Waste Services (we have jointly report Eastbourne/ Lewes staffing0, the Q3 figure reduces to 2.29 days. Waste Services on its own is 5.46 days.</p> <p>Sickness absence rates remained high in Q3 at over 2 days per full time equivalent employee. HR Business Partners continue to support managers in robustly managing attendance issues. There is a range of support offered to those staff absent from work due to sickness including our employee assistance programme which which is designed to support employees with all sorts of work life issues providing support and guidance on a range of issues – 24 hours a day, 365 days a year. We also ensure that absent employees receive regular communication from their line manager, have welfare visits and that we obtain professional medial advise. It remains noting that the average national public sector sickness absence for 2017/18 was 8.5 days (these are currently the most up to date figures published) and that absence rates nationally remain considerably higher.</p>
Social media responsiveness rate	<b>80%</b>	89.67%	87%	<b>95%</b>	<b>80%</b>			'Response rate' is the percentage of new messages received via our Facebook page that we respond to on the day the message is received.
