13 letters of objection have been received in relation to the revisions to the scheme, which are based on the following grounds:

- Overdevelopment
- Scale is too dominant
- Highway safety
- Parking
- Loss of greenspace
- Loss of existing building

Further revisions to the proposed building design have been received, which provides a further reduction in the scale of the building. The revised plans are available on the Council's website.

Proposed conditions regarding the approval of a drainage scheme, management, together with a maintenance plan for the scheme, at paragraphs 10.13 and 10.16 are duplicates and, as such, condition at para 10.13 would be removed prior to any grant of permission.
